SUMMARY

Backend and Full Stack Developer with 4 years of experience designing, building, and maintaining scalable web applications using Node.js, Express.js, MongoDB, and modern JavaScript/TypeScript stacks. Proven track record delivering production REST APIs, microservices, payment and subscription workflows, and third-party integrations.

Hands-on experience with AI-powered systems including RAG (Retrieval-Augmented Generation), vector databases (Pinecone, FAISS, Qdrant), semantic search, and e-commerce chatbot architecture. Strong in database modeling, aggregation pipelines, query optimization, JWT authentication, and secure API design.

Currently expanding expertise in FastAPI, Python microservices, Spring Boot, NestJS, Next.js, Tailwind CSS, Docker, AWS (EC2, S3, Lambda, Route53), Redis, and CI/CD pipelines. Delivery-focused engineer with ownership mindset, effective cross-functional collaboration, and ability to mentor peers on backend fundamentals.

KEY ACHIEVEMENTS

Improved Api Performance

Reduced API response time by 30% with optimized query and caching strategies.

Enhanced User Engagement

Developed AI chatbots increasing user engagement by 25% in E-commerce.

Expanded Api Integrations

Integrated 5 third-party APIs increasing system functionality by 40%.

Streamlined Payment Processes

Implemented secure payment workflows supporting over 1,000 transactions weekly.

EXPERIENCE

Backend Developer

Techeon Pvt. Ltd

Remote

03/2025 - Present

- Architected and maintained backend services for payments, subscriptions, and in-app purchase (IAP) workflows across production environments
- Improved API response times, security posture, and error handling for high-traffic endpoints
- Optimized MongoDB queries, indexing strategies, and service-layer logic to support scalable growth
- Collaborated with product, frontend, and QA teams for end-to-end feature delivery and release stability
- Implemented reusable modules and consistent API patterns to reduce duplication and improve maintainability

Backend Developer

Intelisync Technology

Pune, India

02/2024 - 01/2025

- Designed modular backend architecture using Node.js and microservices for business-critical workflows
- Integrated multiple third-party APIs (payments, notifications, external data) with robust error handling
- Refactored legacy endpoints and optimized database access patterns for better performance
- Established reusable service layers and documentation to improve team velocity and onboarding

Backend Developer

Zimo Technologies

Mohali, India

09/2022 - 12/2023

- Developed and maintained REST APIs using Node.js, Express.js, and MongoDB for production applications
- Built complex data pipelines using MongoDB aggregation for reporting and business analytics
- Participated in Git-based workflows, peer code reviews, and sprint-based agile delivery
- Delivered authentication, CRUD modules, and admin features aligned with client requirements

Backend Developer

Garage Solution Pvt Limited

- Built backend modules for business workflows, admin panels, and operational dashboards
- Implemented JWT authentication, role-based access patterns, and structured data models
- Delivered real-time features and third-party integrations to support client operations
- Improved codebase structure, API consistency, and long-term maintainability

EDUCATION

Diploma in Computer Engineering

LNCT University

Bhopal

2018 - 2021

CORE TECHNICAL SKILLS

AI/ ML SYSTEMS: RAG, VECTOR DBS (PINECONE, QDRANT), LLM INTEGRATION, PROMPT ENGINEERING, SEMANTIC SEARCH, CHATBOTS

LANGUAGES: JAVASCRIPT, TYPESCRIPT, PYTHON, JAVA (BASICS), HTML5, CSS3 • **BACKEND:** NODE.JS, EXPRESS.JS, NESTJS, FASTAPI, SPRING BOOT (BASICS), REST APIS, MICROSERVICES, WEBSOCKETS

DATABASES: MONGODB, MONGOOSE, MYSQL, PRISMA, SEQUELIZE, REDIS, AGGREGATION PIPELINES, INDEXING, QUERY OPTIMIZATION

FRONTEND: REACT.JS, NEXT.JS, TAILWIND CSS, RESPONSIVE UI, COMPONENT ARCHITECTUR

DEVOPS & CLOUD: GIT, GITHUB, DOCKER, CI/CD, JENKINS (BASIC), AWS EC2/S3/LAMBDA/ROUTE53, POSTMAN, LINUX CLI

PRACTICES: AGILE/SCRUM, CODE REVIEW, API DOCUMENTATION, SYSTEM DESIGN (BASICS), UNIT TESTING, DEBUGGING

PROJECTS

Sally AI - E-commerce AI Chatbot

- Designed and implemented RAG-based AI chatbot for product discovery and customer support.
- Integrated vector database for semantic product search, embeddings, and context retrieval.
- Built intent detection, follow-up question handling, and multilingual response capabilities.
- Improved recommendation quality and user engagement through optimized retrieval pipelines

EasyAdmission

- Built scalable backend for student admission and application management platform.
- Developed onboarding APIs, document workflows, and admin dashboards.
- Integrated payment gateways and real-time status updates for applicants and institutions.

Theratap - Telemedicine Platform

- Implemented virtual consultation, booking, and session management modules.
- Designed secure APIs for healthcare data handling and provider-patient workflows.
- Enabled real-time interaction patterns for remote care delivery

Shivsangam - Medical Consultation Platform

- Built online doctor consultation platform with scheduling and patient management.
- Delivered scalable backend services for appointments, profiles, and notifications.

Iskedo - Appointment Booking

- Created appointment booking system with vendor dashboards and user authentication.
- Optimized search, availability checks, and booking performance.

EMS - Employee Management System

- Developed CRUD-based employee records system with structured schemas and admin features.
- Improved internal workflow efficiency through role-based modules.

Pateron Ship - Subscription Content Platform

- Built Patreon-style platform with membership tiers, creator dashboards, and subscriptions.
- Designed scalable payment and content-access backend architecture.

TruckOne - Logistics Platform

- Developed backend for logistics operations including shipment tracking and transport workflows.
- Improved coordination between drivers, dispatch, and operations teams via APIs.

EDUCATION & CERTIFICATIONS

Diploma in Computer Engineering LNCT University, Bhopal | 2018 - 2021 | CGPA: 7.85

Frontend Development Certification Board Infinity, Mumbai | Dec 2021 - May 2022

Backend Development Internship FunctionUp, Bangalore | May 2022 - Aug 2022

INTERNSHIPS & MENTORING

Frontend Development Intern - Board Infinity | Mumbai (Remote)

December 2021 - May 2022

- Completed intensive frontend program covering HTML, CSS, JavaScript, and React.js.
- Built responsive UI components and portfolio projects demonstrating modern web practices.
- Strengthened fundamentals in DOM manipulation, layout, and component-based architecture.

Backend Intern & Mentor - FunctionUp | Bangalore (Remote)

May 2022 - August 2022

- Developed REST APIs using Node.js, Express, MongoDB, and Mongoose in team settings.
- Mentored peers on routing, middleware, schema design, and API testing with Postman.
- Contributed to code reviews, debugging sessions, and backend best-practice discussions.

PROFESSIONAL STRENGTHS

- Strong analytical and problem-solving skills with focus on root-cause debugging.
- Comfortable working under deadlines and production incident pressure.
- Clear communicator in cross-functional and remote team environments.
- Fast learner; quickly adopts new frameworks, tools, and domain requirements.
- Ownership-driven delivery from design through deployment and maintenance
